

PRODUCT DATA SHEET

PROZYME

Prozyme is a live bacteria emulsion which attacks grease, fats, proteins and carbohydrates, breaking down uric acid molecules quickly while digesting the source of odors with no environmental impact. Liquefies and cleans organic waste, paper, grease, fat and other wastes from drains, pipes and grease traps. Restores normal biological activity to septic tanks and sewage treatment plants. Add to recreational vehicle and marine holding tanks, port a-toilets and outhouses to deodorize and aid in digestion. Also effective for odor control, carpet spotting and general hard surface cleaning.

DIRECTIONS FOR USE:

Odor Control

Pre-clean organic matter from soiled surfaces. Spray 4 oz. per gallon directly onto surfaces around areas where odors originate. Reapply and allow surface to remain moist for at least 15 minutes.

Carpet/upholstery: Spray directly onto carpet, upholstery, and fabric to eliminate odors.

Garbage collection areas: To eliminate foul odors, spray directly into dumpsters and on surfaces where decaying or rotting food particles collect.

Restrooms: Spray around urinals and toilets to eliminate urine odors.

Locker rooms and fitness facilities: Spray directly onto sports equipment and in areas where odors linger such as locker rooms, steam rooms, and around urinals and toilets.

General Purpose Hard Surface Cleaning

Spray 4 oz. per gallon directly onto the surface to be cleaned. Wipe with a clean cloth.

Floor Cleaning

Mix 2 - 4 oz. per gallon of water. Apply with mop, spray or high pressure washer. Mop/scrub as needed.

Spot Removal on Carpet

Test carpet or fabric for color-fastness. Remove excess solids or liquid. Saturate the stain and allow 2-3 minutes dwell time. Blot with a clean, absorbent cloth. For more difficult stains, scrub gently with a brush. Repeat as necessary.

Carpet Cleaning

Test carpet or fabric for color-fastness. Mix 2 oz. per gallon of water into an extraction machine. For deep penetration of carpets and upholstery, apply with hypodermic type injector/applicator.

Laundry Pre-spotter

Apply 4 oz. per gallon to soiled areas prior to washing.

Clean and Treat Waste from Drain Pipes and Grease Traps

For initial Treatment: 1qt. (32 oz.). Add to opening closest to trap prior to its longest non-use period. (Large traps may require additional amounts.) Pour 4 to 8 oz. directly into floor or sink drains, twice per week. For grease traps, 20 cubic feet capacity, pour 8 oz. into drain daily. Time application for when drains are least used. For septic tanks, use 16 oz. for initial treatment then 8 oz. per week thereafter.

Large Grease Traps: 200 gallon traps use 10 oz. per day, 500-1500 gallon traps use 18-20 oz. per day, 1500+ gallon traps use 32-40 oz. per day.

Bathtubs, Showers, Sinks: Add 4 oz. twice weekly to drains. Vary amount and frequency according to usage and size of drain.

Garbage Disposal: Add 2 oz. weekly for digestion and deodorizing.

SPECIFICATIONS

Appearance	Milky liquid
Fragrance added	Floral
Weight per gallon	8.50
pH	7.5 - 8.0
Shelf life	1 year

Refer to the Safety Data Sheet (SDS) for detailed safety, health and environmental information.

PACKAGING

Available in 1-gallon containers (4/case), 5-gallon pails, 55-gallon drums, and quart bottles (12/case). Also packaged as Stetco Tip & Measure PZ-32 in 1/2-gallon containers.
